What about excess water run off? There is a Creek right around the proposed area. What would happen if there was a large rain. And the smell would be horrible.

The kind of people that will be brought in to work it

3133758378

Potential adverse conditions for the cattle and semis entering and leaving the area.

This is a LLC company, for one thing, which means if there were problems -- the are LIMITED LIABILITY so guess who will pay for all the clean-up. Water off the Ree Hills comes down in a way that even with their precautions, I don't see how they can stop damage to Turtle and Wolf Creeks which all run into Lake Louise and even over here to Crystal Park.

Do not want to deal with the smell! Totally oppose this project and do not want to see one in the proposed location period.
