save them below

so good he should put it by his place in Brown County. Who knows what the future will hold for our properties. We don't need outside investors that don't care about our roads, lands & future generations exploiting our resources. GC

negatively impact the area in various ways. Progress comes at a price- this price may very well be too high.

es to decrease, will damage our roads, and lead to the economic destruction of our town. Pollution will increase and health impacts will be prevalent.

periences 6.6% loss in property valuations. Within one-tenth of a mile of a CAFO property values can drop as much as 88%. The value of homes is even more sharply affected by proximity to a CAFO. (North Central Regional Center

ness locally before hand before they decided to lie and say they will in the future. They are a bunch of liars that like spending other peoples hard earned money. They can't even operate their feed efficiency grow safe system accurately

ains did exactly that, they roamed the plains. The buffalo had more common sense than we do... Just because we can build it doesn't make it right!

on't want potentially uncontrolled dust and a "fecal fog" to impact our health and air quality.

pletely for this project. I feel that there are possibilities of affecting ground water and road ways. However, having the impact on our County for the income and tax revenue is very appealing. I guess personally I would rather see 50
ed growth no decline.

rest of the community will die. Look around

ask that neighborhood about the impact it has had

to have more population in hand county. I think it is a great idea. I hope it goes through

not believe that confinements the way to raise our food supply...

ve to our area unless it is ag related. We are not economically "rich" to pick and choose what type of business we can use to help the area grow and prosper.

unities. I believe it will do more harm then good according to all the research I have read!!

blic meeting, I would like to be there. I have a fascination of agriculture economics and I am in support of the feedlot. However, in the support column, Agriculture growth is irrelevant in this case. Yes, the feed and corn may be proc

type employees in the county, which will stimulate spending, which will stimulate the economy.

ed across the county instead of one large feedlot

ely on well water to survive. I do not believe the people in charge of this project will follow or abide all regulations for a feedlot of this capacity. They will do the least amount of work for the biggest payoff. As long as they get approved

le economic growth would be severely outweighed by the negative environmental, infrastructure, and safety of the surrounding rural communities.

weekend, at least! I cannot imagine the horrible smell this would bring? It's too large, and water pollution and air pollution would be a factor!

ave kids to make an impact on the school system of Miller. There will be half of them that live in Highmore if not all. Have talked with numerous grain merchandisers in Kansas. A feed lot of that size won't increase local corn prices si

as ALOT of positive potential. HOWEVER, The location of the project is the worst possible placement. This project would benefit the companies and the communities in the area (not to mention the betterment of the cattle and those i
.LC that will literally destroy Hand County if approved. If you have never been to a CAFO of this size, you need to go. It is beyond toxic, producing around 1,494,675,000 # of wet manure/year. Road expense to Hand County for an e
ey see fit

Greeley and Broken Bow --- I challenge anyone to drive down there and take a whiff and talk to the locals. Those places stink even with the "state of the art" plans.

dual's operation but I do not want to se one of that size. I hope to operate and live in that area and do not want to have to deal with the sir pollution it will cause and other possible pollutants. Western Han county is beautiful for open c
ts to big for our region.

north side of Hiway 14 where the runoff from Ree Hills would not be a problem. He owns plenty of land on the north side.

) CHECK OUT OTHER LARGE 40,000 HEAD FEED LOTS BEFORE APPROVING THIS PROJECT. Also check out his partners reputation.

for Rural Development (1999:46); Seipel et al. 1998)

e now.

1,000 head operations at local family farms and bring back the children and their families to the local farms.

duced in Hand County. However, the animals that are going to be fed the silage, forage, and corn will most likely come from parts outside of the area. Much of Hand County has started to turn to row crop production and not livestock

For this project, I believe they will try to cut any corner possible to save a buck. One of the men involved in this project was highly involved with the beef processing plant in Aberdeen, SD. Look at how that plant is fairing now... I lov

gnificantly. Although the potential is there.

that are handling them) far greater if it was North of Highway 14 instead of South.

Extra 29,314 semi loads/year is unsustainable! Research CAFO impacts on rural communities. CAFOs and rural economic development are not compatible!

grazing and has been that way for years. I do not want that to change especially to a project of this size. I hope others in the community that feel this way will speak up and this project is denied.

k. When the animals are at a slaughter weight, they will be shipped out of the county to be either sold or slaughtered, because of this fact very little agriculture growth will occur. It will look like the county output has increase, but wit

e my small town of Ree Heights. We enjoy the outdoors in this community. We don't want it to smell of sewage from 50,000 cattle, plus the health problems that are associated with feedlots of this size. Also, a creek runs through the

h no markets to sell or slaughter the animals we are not able to capture the major benefits of the feedlot. Hand County will see more dollars come to it. However, as stated earlier, since the animals will likely not be bought locally an

middle of this projected feedlot. Several times a year, this location is known to get +3 inches of rain in a very small amount of time, causing flooding. How are they going to prevent the runoff? Hence, again, threatening our ground w
